General Notes

* **POWER:**

_Inverters_ give limited back-up electric power (usually enough for one or two lights and a laptop, for example).

_Generators_ usually give full electric power but can be noisy. Some hotels with a generator will use it only at certain hours (usually to cover evening load shedding/power outages.)

* **HOT WATER:**

_Solar hot water_ gives limited hot water but, during the winter months; this is usually only for a few hours in the afternoon.

_Solar combined with electric_ should give hot water in the afternoons and at night when there is no load shedding/power outages.

_24 hours hot water_ should in theory give hot water all the time but be warned, even this may be unpredictable in some more modest guesthouses.

* **RATES:**

_Prices_, especially in the small guest houses are subject to inflation or fluctuations (often on the whim of the particular staff member one makes the booking with) so the prices in this Guide cannot be guaranteed.

_Taxes_: Where the rates exclude the 13% VAT and the 10% service charge, these additions are cumulative (i.e. add the VAT first and then the service charge on top).

When making a booking, _always ask for a discount_, mention if you are studying at the White Gompa (RYI), or if you are staying for an extended period of time. It doesn’t hurt to ask, and many of these Hotels/Guest Houses will offer a discount.
